SYREBRUM

PRODUCT BROCHURE

SYREBRUM · DESKTOP + PHONE

Your office, run with the AI you already use.

Syrebrum is one app for running a small business. Claude, ChatGPT, Gemini or a local model work inside it, sharing one memory, one task board and one set of safety rules. You approve anything that goes to a customer.

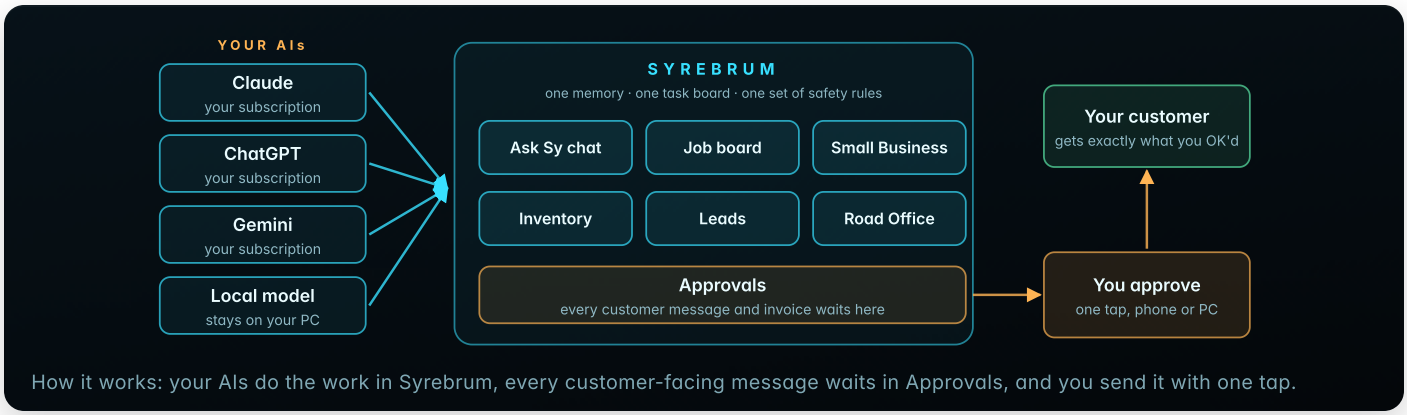

Private beta · Windows 10 and 11 · Android app in beta, iOS planned

THE PROBLEM

Owners pay for a chat AI, a CRM, invoicing, a scheduler, social media and a phone service, and none of them share memory. The owner ends up as the go-between, copying and pasting between tools. And most owners don't have time to set AI up.

WHAT SYREBRUM DOES

It puts the AIs you already pay for to work as one team, on your own machines. It sets itself up, shows you what it can do today, and drafts the work. Nothing reaches a customer until you tap OK.

How it works: your AIs do the work in Syrebrum, every customer-facing message waits in Approvals, and you send it with one tap.

01 What you get

A team of AIs, not one chatbot
Ask Sy with a Primary AI plus any number of others. Type @all and every AI answers; Sy combines them and shows where they disagree.

It shows what it can do
The capability map checks which connectors your AI apps have and shows, task by task, what works now and the one next step for the rest.

Inventory and purchasing
Stock in and out at average cost with markup and margin. Ask for a part and it ranks your vendors' quotes; you approve every order.

Approvals and ALL STOP
Every message is a draft tied to its exact text, so any edit needs a fresh tap. One ALL STOP button stops every agent and every send.

Bring your own AI
Runs on the Claude, ChatGPT and Gemini subscriptions you already have, or a local model. No per-token credits and no paying twice.

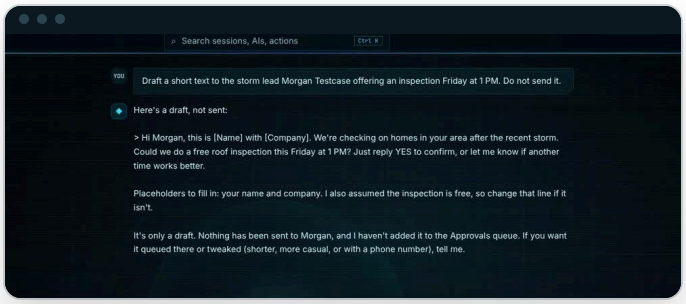

Job board
Jobs from online booking, the answering service or by hand wait for your OK and a time. Paid invoice? The job closes itself.

Small Business tools in every plan
Contacts, catalog, appointments, quotes, invoices with your own Stripe or Square link, follow-ups and review requests.

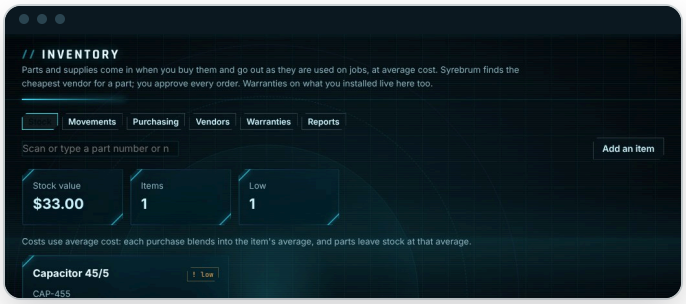

Road Office on your phone
Inbox, schedule, what needs you, and money. Record a cash or check payment on the spot. Talk to your AI by voice.

SYREBRUM · IN THE APP

See it, then try it free.

Ask Sy drafting a customer text. It is only a draft: nothing is sent until you approve it.

Inventory: average cost, price, markup and margin on every part, with a low-stock flag.

Road Office: "Needs you" on the phone.

INDUSTRY PACKS

Small Business	In every plan
HVAC Company	In Pro and Premier
Roofing Company	In Pro and Premier: storm leads, inspections, squares, insurance claims
More packs	General Contractor, Rental, Pool Service, Solo Developer, Gamer & Creator: ask us
