SYREBRUM MCP (CONNECT AI)

Run your shop from claude.ai and ChatGPT.

Syrebrum MCP lets the AI apps you already use work directly inside your own Syrebrum: claude.ai, ChatGPT, and Claude Code, Codex or Gemini apps on the same PC. They read your jobs, leads and inventory and draft the work. You approve what goes out.

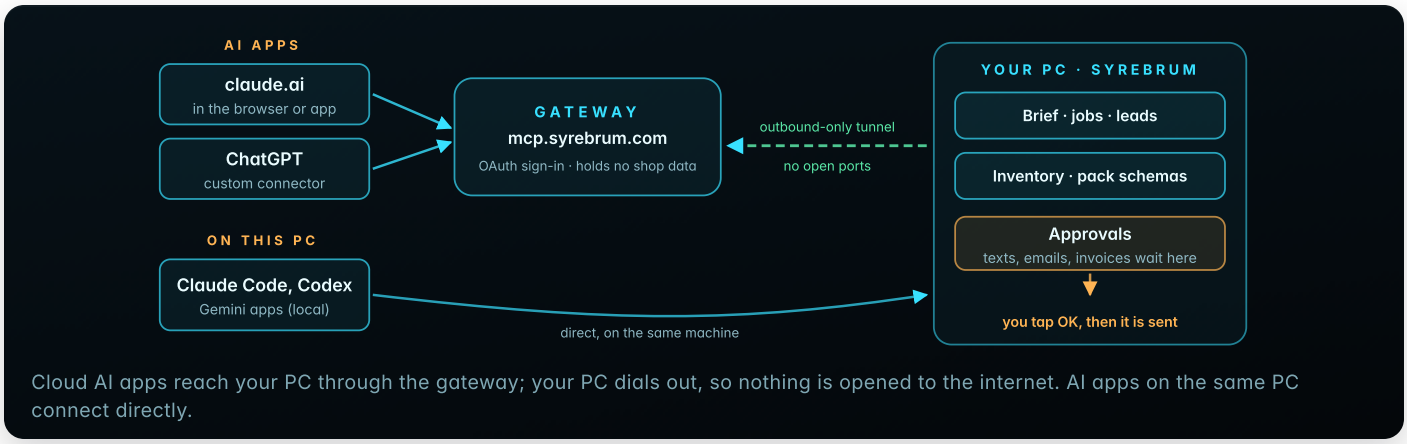

Beta · hosted gateway live at mcp.syrebrum.com · included in every plan

THE PROBLEM

Your AI chat app is smart, but it can't see your business. You copy jobs, customers and numbers into it, then copy its answers back out. Hosted connector services that could bridge the gap are another monthly bill, and they hold your data on someone else's server.

WHAT SYREBRUM MCP DOES

It connects your AI app straight to the records on your own PC through a secure tunnel. The AI works with your real jobs, leads and stock, and anything that would reach a customer is only drafted into Approvals for your tap.

Cloud AI apps reach your PC through the gateway; your PC dials out, so nothing is opened to the internet. AI apps on the same PC connect directly.

01 What your AI can do

Read your business
The morning brief, the job board, leads, inventory, what is waiting in Approvals, and each pack's record layout.

Keep jobs moving
Add notes and close out jobs. Booking, cancelling or rescheduling from an outside AI waits for your tap.

Ready-made prompts
"Set up my business", "Morning brief" and "Chase what I'm owed": one click in your AI app, no prompt writing.

Work your leads
Log new leads and draft follow-ups. The drafts land in Approvals; nothing is texted or emailed until you tap OK.

Record stock
Log stock in, out and moves as the work happens, with the same inventory rules as the app.

Your AI, your choice
Use the hosted gateway, host your own, or another MCP provider. Syrebrum works fine without it, too.

SYREBRUM MCP · SAFETY

Powerful, and still yours to approve.

02 Built-in safety

Customers only hear from you
Texts, emails and invoices are only drafted into Approvals. You send each one with a tap.

Labelled tools
Every tool is marked read-only or changes-something, so your AI app can ask before it changes anything.

A record of who did what
Job and lead history shows which AI app made each change.

Your calendar is yours
Booking, cancelling or rescheduling a job from an outside AI waits for your tap.

Locked-down extras
Web fetching and tool-building are never offered to outside AIs.

Usage per AI app
See how much each AI app used Syrebrum, so you know who did what.

03 How it connects

Hosted gateway	mcp.syrebrum.com reaches your PC through an outbound-only tunnel. No ports to open; the gateway holds no shop data.
Sign-in	OAuth, approved from your AI app. Turn it on or off any time in Settings, under Connect AI.
On the same PC	Claude Code, Codex and Gemini apps connect directly.
Your own way	Self-host the gateway (its address is configurable) or use another MCP provider.

04 How to get it

WITH EVERY SYREBRUM PLAN

Included

- Basic $29.99 · Pro $49.99 · Premier $99.99 a month
- Hosted gateway in beta

SELF-HOSTED GATEWAY LICENCE

Ask us

- Run the gateway on your own server

05 See it in action
