SYREBRUM

PRODUCT FAMILY

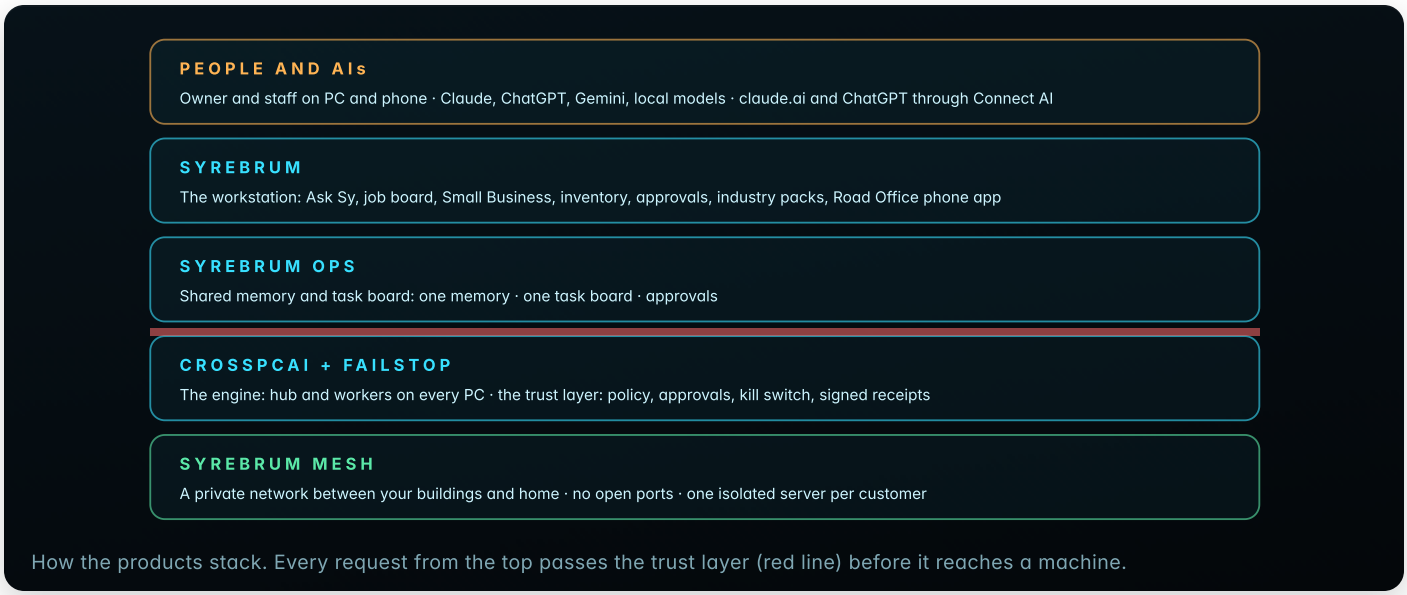

CCD ENTERPRISE & DEVELOPMENT

The AI workstation for any business.

Syrebrum is where a team of AIs (Claude, ChatGPT, Gemini and local models) meet with one shared memory, one task board and one trust layer, on the business's own machines. The owner approves only what matters.

One download · bring your own AI · built in Louisiana

> The same app serves a roofer, an HVAC shop, a salon, a software developer and a growing office. Customers bring the AI and the subscriptions they already pay for, and Syrebrum makes them useful without anyone needing to know how to set up AI.

How the products stack. Every request from the top passes the trust layer (red line) before it reaches a machine.

Your AI, no double billing
Syrebrum runs the Claude, ChatGPT and Gemini subscriptions you already have as team members. It is not a resold model.

Local first
Your records stay on your computers, and Syrebrum can use every PC in the office.

Safety you can see
Approvals tied to the exact text, append-only history and one ALL STOP for everything.

00 Getting started

1
Install once
One installer for Windows, with Linux machines as workers. It picks its role and sets itself up.

2
Bring your AI
Connect the Claude, ChatGPT or Gemini you already pay for, or a local model. Syrebrum shows what works today.

3
Approve the work
Your AIs draft the messages, quotes and invoices. You send each one with a tap, from your PC or phone.

THE PRODUCTS

Six products, one download.

Syrebrum

BETA

Desktop and phone app: business software with a team of AIs built in.

- Ask Sy, job board, Small Business tools, inventory, approvals
- Industry packs: HVAC, Roofing and more
- Road Office phone app: Android in beta, iOS planned

Basic $29.99 · Pro $49.99 · Premier $99.99 a month

Syrebrum Ops

PREVIEW

Tasks, docs, chat, approvals and memory for people and AIs together.

- One task board with leases and attempts
- Memory where a person's word wins
- Self-host on your LAN or VPS

Included in Pro and Premier · self-hosted licence: ask us

Syrebrum Mesh

BETA

A private network between your machines, with your own control server.

- One isolated control server per customer
- Safety flags fixed in code
- Works alongside an existing Tailscale

With Syrebrum · standalone service: ask us

CrossPCAI

LIVE

The engine: hub, workers, screen sharing and bring-your-own-AI, in one installer.

- Tasks routed to the machine that can do them
- Health, throttle and ALL STOP on every PC
- Signed updates

Inside every Syrebrum plan

Failstop

IN USE AT CCD

Agent governance: kill switch, approvals and signed receipts.

- Five-signal behavior score
- No answer means deny
- Hash-chained, Ed25519-signed receipts

Licensed add-on · ask us

Connect AI

BETA

Use your Syrebrum from claude.ai or ChatGPT.

- Outbound-only tunnel: no ports to open
- The gateway holds no shop data
- You approve the connection in your own Syrebrum

With Syrebrum · self-hosted gateway possible

01 Ways to run it

One PC
Syrebrum and your own AI subscriptions. Records stay on the PC.

Office fleet
Windows and Linux PCs on one network, with an optional LAN-only switch.

Multi-site
Sites joined by Syrebrum Mesh or your own Tailscale.

Cloud-connected AI
claude.ai or ChatGPT reach your shop through Connect AI.

Self-hosted Ops
On your LAN, tailnet or a rented Linux server, with a one-command installer.

Local AI only
Local models and offline licence keys, for shops that keep everything inside.

WHO IT'S FOR

Built for any business, any size.

01 Industries

Trades	HVAC, roofing, contracting, pool service and rental, with ready packs: insurance claims, good/better/best quotes, service plans and warranty records.
Small and professional services	Salons, cleaners, consultants and offices. The Small Business tools are in every plan.
Software developers	Solo Developer pack, coding agents on several machines and per-folder permissions.
Privacy-minded and regulated teams	Self-hosted options keep data on your own machines, with a LAN-only switch, local models, private mesh, approvals and an audit trail.

02 Industry packs

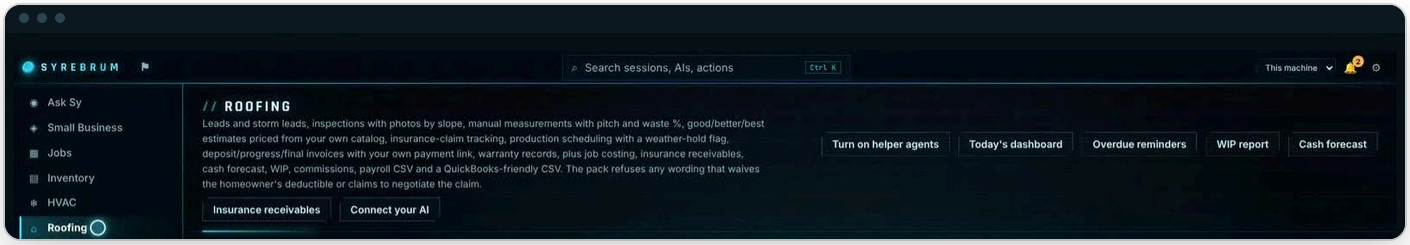

Packs add the screens and records a trade needs, on top of the Small Business tools in every plan.

- Small Business · every plan
- HVAC Company · Pro and Premier
- Roofing Company · Pro and Premier
- General Contractor
- Rental Company
- Pool Service
- Solo Developer
- Gamer & Creator

Highlighted packs come with the plan shown. Other packs: ask us.

03 Every plan includes

Ask Sy	Chat with a Primary AI and any number of others
Approvals	Every customer message and invoice waits for your OK
ALL STOP	One button stops every agent and every send
Small Business	Contacts, quotes, invoices with your own Stripe or Square link, follow-ups

The Roofing Company pack in Syrebrum, with fictional customers.

04 Plans

Real software, recorded on dev copies and test machines with fictional names, phone numbers (555) and emails (.invalid). Videos marked explainer show real code and commands, not a live customer setup.

01 About CCD

C.C.D. Enterprise & Development LLC is a software and AI company in Shreveport, Louisiana. Its founder spent 20 years in the field before building Syrebrum, which is why the trade packs know insurance claims, service plans and warranty records, and why every customer message waits for the owner's OK.
